

API Gateway in NodeJS

Date: 2022-11-23 20:29:12

<https://github.com/life-is-curiosity/js-apigateway>

Feature

- 1. API Rules
Parameter checking

- Support regular-expression
- 2. **Distributed Load-Balancing Algorithms**
Random-Weighted Average Load-balancing algorithms to route the requests to different microservice endpoints.
- 3. **Asymmetric JWT Double-Lock Session**
Support private api, asymmetric key lock and basic session management
- 4. **Rate-Limit Components**
Able to customize the rate-limit for preventing the system loading
- 5. **Http API Proxy Gateway**
Http API redirect to other internal service endpoints
- 6. **Single Redis Instance**
Session or any persistence by Redis

Environment Construction

npm install or yarn install

Configuration

```
{
  "redis": {
    "host": "localhost",
    "port": 6379,
    "auth": "",
    "db": 0,
    "max_clients": 30,
    "tls": false
  },
  "rate_limit": {
    "interval_ms": "60000",
    "max_requests": "120"
  },
  "service_endpoints": {
    "timeout": 5000,
    "user": [
      {
        "hostname": "localhost",
        "port": 3001,
        "weight": 10
      },
      {
        "hostname": "localhost",
        "port": 3002,
        "weight": 2
      },
      {
        "hostname": "localhost",
        "port": 3003,
        "weight": 2
      },
      {
        "hostname": "localhost",
        "port": 3004,
        "weight": 4
      }
    ]
  },
  "session": {
    "algorithm": "RS256",
    "expire": 180
  }
}
```

Execution

pm2 start pm2.json --env local > /dev/null
